

REMARKS

Consideration and entry of this §1.312 Amendment is respectfully requested.

This Amendment is submitted to correct the title of the invention. An official filing receipt dated December 17, 2004 identifies the title as "Operational Frequency Range of Latch Circuits." During the prosecution of this application, no amendments to the title were either filed or requested. Nevertheless, a Notice of Allowance dated June 24, 2006 identifies the title of the invention as "Circuit Performance." Based on the foregoing amendment, Applicant requests that the title "Circuit Performance" be changed to "Operational Frequency of Latch Circuits." Applicant requests entry of this amendment and issuance of a new Notice of Allowance that reflects the title change.

In addition, Applicants request the acknowledgement to an entitlement of foreign priority under 35 U.S.C. §119(a) and §365(b) with respect to foreign applications GB 0314999.4 and EP 03254112.0. Foreign priority benefits were claimed with respect to the aforementioned applications in a Declaration filed on July 22, 2004. Furthermore, Applicants submit that these same priority benefits were properly claimed in the International stage of the parent PCT application. For at least these reasons Applicants request that the foreign priority benefit be acknowledged in the next communication.

Respectfully submitted,

BUCHANAN INGERSOLL & ROONEY PC
